## Summer training courses 2014 - places available

We would like to draw your attention to our annual in-house training courses, which take place on **9th-13th June**. If you are new to Fault-Seal Analysis and/or TrapTester, or simply want to refresh your skills, join us here in Lincolnshire.

### Fault-Seal Analysis (9-10 June)

This two-day theory based course, will take place on **9 & 10 June**, and is regarded by many explorationists as the industry standard training course on methods and techniques for evaluating sealing faults. The emphasis is placed on the application of an objective methodology to the analysis of sub-surface data (seismic interpretation and wells). The course is suitable for geologists, geophysicists and reservoir engineers. All sessions comprise practical sessions and lectures.

### Fault-Seal Analysis using TrapTester (11-12-13 June)

The popular three-day TrapTester training course will take place on **11-12-13th June**. It is suitable for geologists who have no previous experience of TrapTester and also would be a perfect refresher for those who have not used TrapTester for a while. The course develops and expands the most frequently used workflows leading to fault seal analysis and column height prediction. In addition to the primary focus, the course covers the key factors that influence any fault seal analysis, namely fault interpretation and framework modelling. Concepts/practices covered include interpreting faults and horizons in 3D seismic, derivation of a geologically robust three dimensional faulted framework model, structural quality control, geometric seal analysis, integration of well data, the SGR method, fault seal calibration and geomechanical risk factors. If you wish to register for one or both of these courses, please **contact us** or phone us at +44 (0) 1790 753472. Visit our **website** for more information.

## BADLEYS CALENDAR

### Fault-seal & TrapTester training courses 2014

9 - 13 June  
Badleys HQ  
Hundleby, UK

We will be running our annual Fault-Seal Analysis and Introduction to TrapTester in-house training courses in June. Places are still available. See this newsletter and our **website** for more details.
