Technical presentations at Small to Subseismic Scale Deformation conference, London Oct 29 - 30

Badleys will have a strong technical presence at the upcoming Small to Subseismic Scale Deformation conference, to be held at Burlington House (the home of the Geological Society of London) in Piccadilly. Badleys are also sponsoring this event. Registration is still open and can be accessed [here](#).

Emma Michie: Predicting the Sealing Potential of Carbonate-hosted Normal Fault Zones. *Wednesday 12:15*

Graham Yielding: Geomechanical Fracture Prediction - A Case Study Calibrated by Seismic Attributes and Core Analysis. *Thursday 12:00*

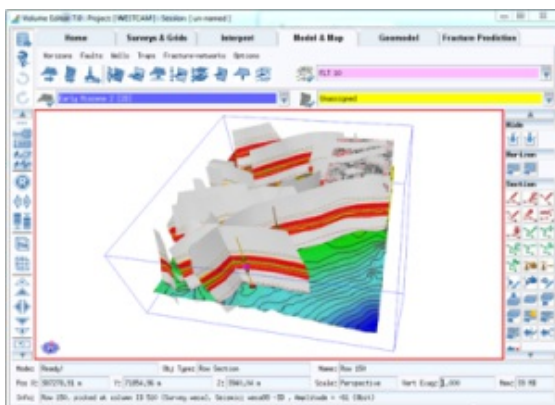

Quentin Fisher (research collaborator): Core-Scale Deformation Analysis: What Can It Tell Us? *Thursday 11:30*

TrapTester User Meetings: London (Oct 13) / Aberdeen (Nov 3)

Badleys will host TrapTester user meetings at city centre locations in both London (Monday October 13) and Aberdeen (Monday November 3rd) later this year. Attendance is free for both existing and prospective clients on a first-come, first-serve basis. If you would like to register your interest please [contact us](#). Further information can be found [here](#). Join us for:

- **What's new in TrapTester:** Introduction to the upcoming major new release, T7
- **Technical presentations:** by Badleys, company representatives, universities...
- **User tips:** Best practice structural interpretation
- **Meet the Geek:** software development forum

IN THIS ISSUE

- **Technical presentations at Small Scale Deformation (Geology Society) meeting London**
- **User meetings London & Aberdeen**
- **OCTek announcements**
- **TT at GSA Vancouver**
- **Badleys to exhibit at the SEG Denver**

BADLEYS CALENDAR

London User Meeting

13 October
London
UK

User meeting free to attend. See this newsletter for further details.

SEG Denver 2014

26 - 31 October
Denver
USA

Badleys will be exhibiting at the SEG to be held in Denver, USA. More details to follow in future newsletters. Visit the SEG [website](#) for more info.

Small to Subseismic Scale Deformation

29 - 30 Oct 2014
London,
UK

Badleys will have a strong presence at this event. See this newsletter for more detail. Visit the conference [website](#) for further information and to register for the event.

Aberdeen User Meeting

3 November
Aberdeen
UK

User meeting free to attend. See this newsletter for further details.

Fault & Top Seals 2015

20 - 24 September
Almeria
Spain

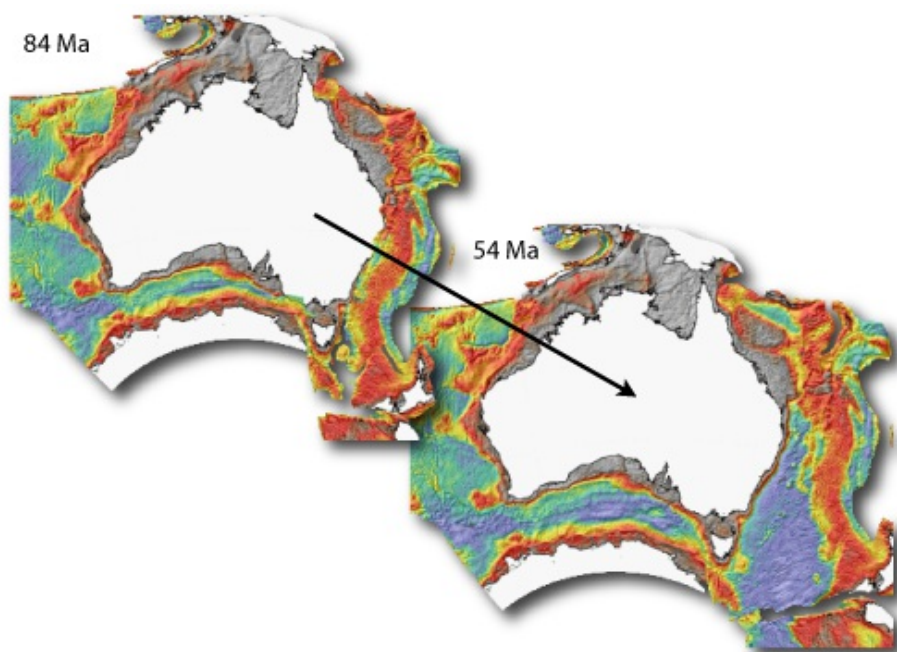

OCTek announcements

We are delighted to announce that the plate reconstruction section to the OCTek-Australasia report is now finished. Details of how to download the updated version of this report are being emailed to the companies that have purchased the report.

Work on the sixth OCTek report is now underway. This study is on the Gulf of Mexico and Caribbean and will be available for purchase by the end of Q4 2014.

If you would like more info on any of our current OCTek reports or future plans then please see our [website](#) and don't hesitate to [contact us](#)

Badleys will have a strong presence at this event. More details to follow in future newsletters. Visit the conference [website](#) for more info.

TrapTester training at the GSA Annual Meeting, Vancouver, BC Canada, Oct 19 - 22

Bob Krantz and Simon Kattenhorn (ConocoPhillips) along with Barbara Tewksbury (Hamilton College) will run a one-day pre-conference course on Saturday October 18 using TrapTester. The course description is as follows: Seismic Structural Interpretation for Academic Faculty. Recent collaborations between structural geologists in academia and industry have illuminated the similarities and differences in how they visualize and interpret 3D structures, whether derived from surface outcrop or subsurface seismic data. This course will provide an introduction to 3D seismic data interpretation using a structurally oriented industry software toolkit (TrapTester). The day will begin with a virtual field trip to a well-exposed fault system, followed by a seismic interpretation module based on the same fault zone. The second interpretation module will use a more typical industry data set.

This class is co-sponsored by ConocoPhillips and Badley Geoscience.

GSA 2014

19-22 October | Vancouver, BC, Canada

Badleys exhibiting at the SEG Denver, Oct 26 - 31

Badleys will be well represented at the SEG Exhibition and Conference in Denver this year. Visit us at our Exhibition Booth #2178 to discuss any structural geology issues or the OCTek project.

Dave Quinn will present at the technical conference on QA in seismic interpretation. More announcements in future newsletters.
