Badleys invites you to TrapTester User Meetings: London (Oct 13) and Aberdeen (Nov 3)

Badleys are soon to release a major version upgrade: T7.

T7 is the culmination of many years hard work and we hope you find the new features, updated interface and enhanced usability a positive experience. To coincide with the release of T7 we would like to invite you to our inaugural free-to-attend London or Aberdeen User Group Meetings. We welcome all geo and IT staff from both existing and prospective companies to join us. If you (or a designated colleague) cannot attend then don't worry, we plan to have plenty of resources in place by the time we release the new version.

The User Group meeting is an informal, open forum to meet other users from the TrapTester community where you can share experiences and techniques on how to get the very best out of the software. Our aim is for the meeting to be led by you, the TrapTester User Community. Badleys staff members will be there as your hosts and to provide a platform for you to enter into discussion points with other users and, where possible, to comment on how you use TrapTester in your everyday work. Please see agenda opposite.

Contact us if you or your colleagues are interested in attending either meeting, we'll keep you updated with additional information and to confirm nearer the time whether or not you can make it.
