T7 News

The T7/TrapTester section of our website has had a revamp for 2016, describing the new structure of our software with short video introductions. We have divided T7 according to its 4 main functions. CORE is the interpretation-modelling-mapping toolkit and forms the base for the extended functionality available in SEAL, GRID and FRAC. We invite you to **take a look** and as ever comments are welcome.

OCTek News

We look forward to launching OCTek Mediterranean at the AAPG/SEG ICE in Barcelona, April 1 - 3. Come see us at Booth 220-318 on the main aisle to discuss this and other OCTek projects. There will be more on this in future newsletters but if you would like to register your interest please **contact us**.

Carbonate Fault Rock Project News

The Carbonate Fault Rock Project now has four sponsors, we are pleased to welcome Wintershall and ENI to the group. Two PhD students joined the project in October 2015 and fieldwork has begun in earnest, with fault rock samples already collected from Malta, Gozo, Sicily and mainland Italy. We look forward to the kick-off meeting at the University of Leeds on Monday February 15th. If you would like to know more about how your company could join to CFR Project then please **contact us** for details.
