Patch v6	2

Release v1	18/01/2013	Initial TrapTesterVM release
-------------------	------------	------------------------------

PATCH INFORMATION

Patch v2	04/02/13	Patch release (WindowsVM)
<i>Bug Fixes/Enhancements</i>		
<2347>	Patching system has been upgraded to provide the facility to apply changes to the guest operating system (Ubuntu Server).	
<2348>	The TrapTester data area in the guest (/home) that contains both projects and backups will now be automatically mapped to an available drive letter on the host upon startup of TrapTesterVM. The mapping will unmap automatically upon shutdown of TrapTesterVM	

Patch v3	08/05/13	Patch release (WindowsVM)
<i>Bug Fixes/Enhancements</i>		
<2349>	TrapTester fails to launch with "Failed to get VMware IP" error.	
<2350>	Failure to launch with "Failed to connect via SSH" error	
<2351>	Xphoto fails to launch image viewer	
<2352>	Miscellaneous security fixes	
<2353>	Failure to launch second instance of TrapTester or Triangle-Direct	
<2354>	Text editor fails to launch for faps.conf and other edit operations	

Patch v4	05/11/13	Patch release (WindowsVM)
-----------------	----------	---------------------------

Bug Fixes/Enhancements

<2414>	Add support for VMware Player 6, Workstation 10
<2415>	Occasional proxy communication failure may cause license error.

Patch v5	19/11/13	Patch release (WindowsVM)
-----------------	----------	---------------------------

Bug Fixes/Enhancements

<2426>	Configurable FTP settings using new default high-speed FTP server
---------------------	---

Patch v6	29/09/14	Patch release (WindowsVM)
-----------------	----------	---------------------------

Bug Fixes/Enhancements

<2490>	TrapTesterVM fails to shutdown automatically after license has been borrowed via Borrow Tool
<2491>	Crash when borrowing licenses using Borrow Tool
