

Support over the Festive Period

It has been another busy year at North Beck House. T7.21 was a major upgrade to the TrapTester T7 system, with an even bigger release in the pipeline for next year. While consultancy, training, conferences and client visits took us around the world, our excellent representatives in Indonesia, Malaysia, Egypt, Nigeria and China have continued to support us in their regions. We are very grateful for all they do. We hope that 2024 is a prosperous year for our T7 / structural geo community. Should we be able to assist with any challenges they face, we will endeavour to do so.

Our office will close on December 23rd and reopen on January 2nd. During this time we will maintain our high level of technical support. If you have any queries during this period simply email **Support** as usual. We will respond as quickly as possible.

Happy Christmas from all at Badleys. Wishing everyone a happy, healthy, prosperous New Year.
